

CLEANING BUSINESS AI GROWTH OS

Quick Start Guide

Set up your system in 30 minutes and run your day in 10.

Up and running in 30 minutes

Welcome. This system runs a cleaning business from first inquiry to final payment: leads, quotes, jobs, recurring visits, your team, quality checks, payments, expenses and profit — all in one connected workbook that works in Microsoft Excel and Google Sheets.

What's in the box

File / folder	What it is
CLEANING-BUSINESS-AI-GROWTH-OS-DEMO.xlsx	A fully working example business with fictional data. Explore it first — nothing you do here matters.
CLEANING-BUSINESS-AI-GROWTH-OS-CLEAN.xlsx	The same system with no sample records. This becomes YOUR business file.
QUICK-START-GUIDE.pdf	This guide.
FULL-USER-GUIDE.pdf	Every module explained, plus assumptions, resetting, troubleshooting and FAQs.
AI-WORKFLOW-LIBRARY.pdf	18 copy-and-paste AI workflows for messages, quotes, reviews and marketing.
CLIENT-FORMS/	14 editable customer and staff documents (Word + PDF).
MARKETING-KIT/	Editable flyer, door hanger, cards, social templates and post copy.

Step 0 — Open the right file

- **Excel (desktop or Microsoft 365):** open the CLEAN file and choose *Save As* to keep an untouched backup.
- **Google Sheets:** upload the CLEAN file to Google Drive, open it, then *File* → *Save as Google Sheets*. Work in the Google Sheets copy.
- **Apple Numbers** is not supported (several formulas and dropdowns behave differently).

The 5 setup steps

- 1 **SETTINGS** — Type your business name, phone, email and booking link. Then replace the example cost assumptions: worker pay rate, extra labor cost %, supplies per labor hour, vehicle cost per mile, card fee %, target margin and minimum job price. Leave the *as-of date* blank.
- 2 **STAFF & TASKS** — Add every person who cleans (including yourself if you do) with their pay rate. Names feed every Worker dropdown.
- 3 **PRICING** — Adjust the billing rate per labor hour and the time assumptions for each cleaning type. Watch the rate card at the bottom update. Keep adjusting until those prices reflect how you want to price in your market.
- 4 **CUSTOMERS & PROPERTIES** — Add your current customers, then one row per property with square feet, bedrooms and bathrooms (these create the automatic time estimate on every job).

- 5 RECURRING & JOBS** — Add recurring plans, then upcoming jobs. Pick the Plan ID on recurring visits so the system tracks what's due next.

Test it: open QUOTE BUILDER and price a home you know well. If the result looks wrong, change the PRICING assumptions — not the formulas.

Your daily 10-minute routine

When	Do this	Where
Morning	Check the ACTION CENTER: follow-ups due, unpaid jobs, recurring visits to book.	DASHBOARD
New inquiry	Add a row, reply with AI Workflow 01, set Next Follow-Up.	LEADS
Quote	Price it, copy the summary into AI Workflow 02, enter Quote Value.	QUOTE BUILDER → LEADS
Booked	Stage = Booked; add customer + property; add the job.	LEADS → CUSTOMERS → JOBS
After each job	Status = Completed, actual hours; log payment and miles.	JOBS, REVENUE, MILEAGE
Happy customer	Send a review request (Workflow 07).	REVIEWS
Weekly	Book recurring visits due; review SCHEDULE; plan marketing (Workflow 18).	SCHEDULE, RECURRING
Monthly	Review profit by service and worker; adjust pricing if margins are below target.	MONTHLY, PROFITABILITY

Five rules that keep it working

- Type only in white cells. Gray cells and ⚙️ columns are automatic.
- Use the dropdowns — they keep the sheets connected.
- Keep customer names, property labels and staff names unique (add an initial if two match).
- Need more rows? Type in the next empty row; there's room for 1,500 jobs and payments. See the User Guide to extend.
- Back up weekly: File → Save a copy (Excel) or File → Make a copy (Google Sheets).

Plain-language disclaimer

This product is a set of spreadsheet tools, templates and writing prompts that help you organize a cleaning business. It is not legal, tax, accounting, payroll, employment, insurance, safety or regulatory advice, and it does not replace a qualified professional.

- **Prices and profits are estimates.** The calculators turn YOUR assumptions into numbers. They do not know your local market, and the example assumptions included are starting points, not recommended or market rates.

- **No earnings promises.** Using this system does not guarantee more customers, revenue or profit. The demo business and all its numbers are fictional.
- **Templates need your review.** Policy, proposal and agreement-style templates are customizable starting points. Have anything you will rely on legally reviewed by a qualified professional where you operate.
- **Taxes, mileage, payroll and worker classification** rules vary by location. Confirm them with a qualified professional.
- **Safety:** always follow product labels, safety data sheets and local requirements. Checklists in this kit are quality checklists, not safety programs.
- **AI tools** can produce wrong or made-up information. Review every draft. Do not paste sensitive data (access codes, payment details, ID numbers) into AI tools.
- **Privacy:** you are responsible for how you collect, store and use customer information and for getting permission before sharing photos of customers' homes.
